

Adding multiple gallery links to a page

You might have a photo gallery page that you would like to house all your photo galleries. We can do this by creating a series of pages housing one gallery each. We will then link these galleries to one page titled "Photo Gallery" so that your audience can scroll through and see what has been happening at school.

1. Create your photo galleries as usual, see: 'Creating a photo gallery' Cheat Sheet if you need assistance with this step!

2. Now create separate pages for each gallery – you will only need to create a page with the title of the gallery, and select the gallery from the drop down menu.
